\$49 The Foynman rules for Majorana fields

$$\mathcal{L}_1 = \frac{1}{2} g \varphi \overline{\mathbf{I}} \mathbf{I}$$

=
$$\frac{1}{2}g\varphi\overline{\Psi}\Psi$$
 (49.1)

 $\int \overline{U}: Majovana field (mass m)$
 $Q: real scalar field (mass M)$
 $g: coupling ronstant$

bs(p) in
$$\rightarrow -i \int d^4x \ e^{+ipx} \overline{\nu_s(p)}(-ip+m) \underline{\Psi(x)}$$
 (49.2)
= $+i \int d^4x \ \underline{\Psi}^{T}(x) ((+ip+m) u_s(p) e^{+ipx} (49.3)$

$$bs(p)_{out} \to +i \int d^{3}x \, e^{-ip^{3}x} \overline{u}_{s'}(p')(-ip'+m) \, \underline{\Psi}(x) \qquad (49.4)$$

$$= -i \int d^{4}x \, e^{-ip'x} \, \underline{\Psi}^{T}(x) \, C(+ip'+m) \, v_{s'}(p')(49.5)$$

$$=-i\int d^4x \, e^{-ip'x} \, \overline{\Psi}(x) \, C(+i\not \!\!\!/ +m) \, N_{S'}(p') (49.5)$$

$$- \left\{ evmion \ propagator : \frac{1}{i} \, S(x-y) \, C^{-1} \right\}$$

-Termion propagator:
$$\frac{1}{i}S(x-y)C^{-1}$$
 (cf. 42.20)

Vertex

: ig C

(49.2)~ (49.5) とこれろで CとC をキャンセル することで Feynman rule に Cがま見れない
